

Fast-track your career with Together Academy.

If you're currently studying for A-Levels or an equivalent, and think uni might not be for you, consider an apprenticeship with Together. We're one of the finance industry's best-kept secrets. But we're not a bank; we're a mortgage and loan provider. And while we've been in business for nearly 50 years, we're a lot like a start-up: growing fast, and shaking up our industry.

Our graduates and apprentices make a real impact on our business, not the coffee.

Our leaders are passionate about our Academy colleagues which means you'll be at the heart of major projects, creating important tangible outcomes designed to build your experience and confidence in the workplace, gaining recognised qualifications as you go.

You'll also get free gym access, your birthday off, and get to take part in our (very generous) company bonus scheme as well as many more benefits.

Then, when your apprenticeship ends after two years, we'll give you the option to stay permanently. We've got apprenticeships available across all sorts of disciplines. And if you're not sure what you want to do, we'll work with you to find the best fit.
